

Protect Your Production Lines from Fire & Costly Downtime

New Features

- Simplified installation in new or existing lines.
- Patented ARGUS Static Control infrared spark detectors.
- Improved protection against interference & vibration.
- Self monitoring indicator lights - low air pressure, low water level.
- Water spray extinguisher system is easy & inexpensive to refill.

Standard Features

- Automatic fire protection for production & card lines.
- Compact, requires only 2.2 meters for installation.
- 24 volt operation, requires 5.5 BAR plant air pressure.
- 50 millisecond reaction time, means less waste.
- Operates in both positive and negative pressure.
- Easy to retrofit in existing production lines.
- Connects to any ARGUS control panel.
- Spark is diverted, extinguished, machines stopped & alarm sounded.

ARGUS

AD-50eS Spark Diverter System

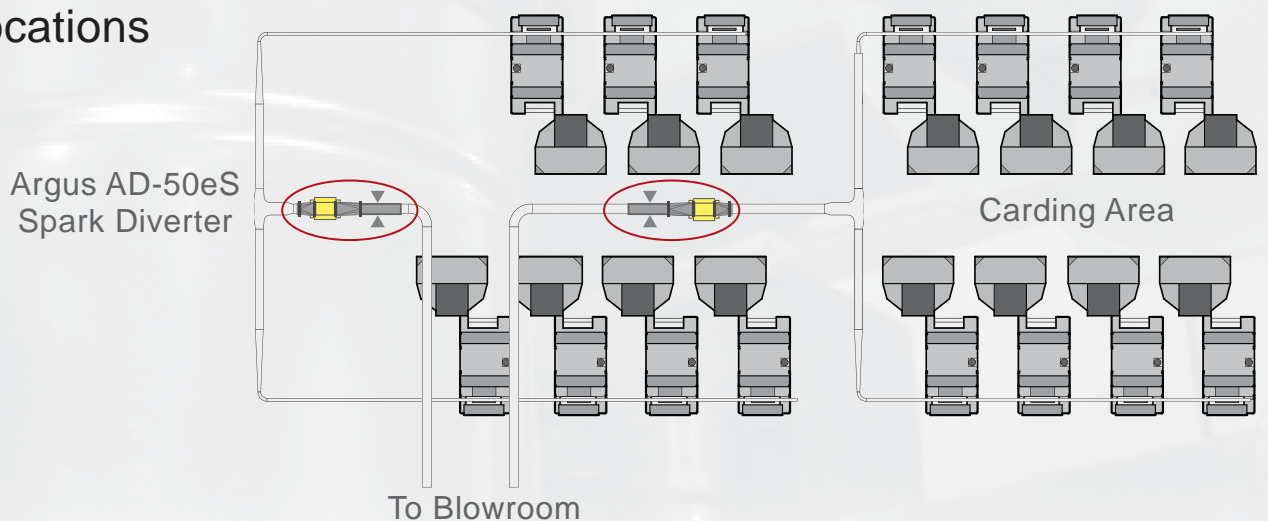

Dimensions

Argus Infrared Spark Detector

A Spark or Ember is sensed by an Argus Infrared Spark Detector in 5 milliseconds at speeds up to 60 meters per second.
